Portability	Extremely Portable	Portable	Portable	Stationary/Portable – This unit is heavy. May be moved in upright position only. Oil must be drained prior to shipping.
Durability and Intended Use	This unit is professional quality but not designed for continuous daily use in a commercial setting. It was designed primarily for its portability. Scentual Sun does not recommend this unit for anything but intermittent use. Most of our competitors sell this unit as a primary system. Use as a primary system in a busy commercial salon will probably result in premature heat related system failure. Cool down period recommended after 30 minutes of continuous use. Suitable for tanning, nails, body art or makeup. Warranty is void if used other than as intended.	This unit is professional quality and is designed for continuous daily use in a commercial setting. Ideal for all airbrush applications. Its air tank, twin piston power, and Scentual Sun reconfiguration make it the ideal choice for the airbrush tanning business. A very reliable daily performer. The same unit as our Professional Dual Station without the extra line set and airbrush.	This unit is professional quality and is designed for continuous daily use in a commercial setting. Ideal for all airbrush applications. Its air tank, twin piston power, and Scentual Sun reconfiguration make it the ideal choice for the airbrush tanning business. A very reliable daily performer. Can handle two airbrush tanning stations simultaneously or any combination of salon uses such as makeup, nails, body art, or makeup.	The highest quality equipment available. This oil filled compressor is the finest, most durable unit of its kind. Reconfigured by Scentual Sun, it is capable of handling up to four individual airbrush tanning stations running simultaneously hour after hour day after day week after week year after year. The ultimate in flexibility, this unit can do nails, makeup, tanning, and body art all at once in the same salon and you'll never hear it run.
